

The elegance is arriving: from the office to your home.

NUBIA

NUBIA is the new directional purpose from Talin. The round mono-shell frame is totally realised in metal and upholstered by an injection foam flame retardant; and is available in three sizes.

The soft Design of NUBIA is put in evidence by the lines of the seam in contrast with the leather/fabric.

High impact has the managerial version of NUBIA with the upholstered headrest and adjustable lumbar support.

Born for the office furnishing, NUBIA feel very good also into

informal atmospheres as meeting areas, conference rooms, fashion pubs. Also NUBIA is projected and produced into the Talin's center in Italy, with particular attention to the Design (ergonomic attention), to the quality standards of construction (EN 1335), to the environmental standards (ISO 14001), to the total quality standards of the company (ISO 9001), to the ethical-social standards (SA 8000).

Talin since 1955 tradition in Evolution.

NUBIA
per l'arredo fashion
dell'ufficio, della casa,
della collettività.

Seams lines in contrast.

work and relax, meeting and drink

1... Mono-shell in metal with injection foam at cold.
